NM EQIP FY 2006 Ranking Criteria Worksheet - Irrigated Cropland - Aztec F.O.

Applicant		Farm No	Tract No	CMS Field No's		Date
Tribal Land	Non-Tribal Land			Preliminary	Final_	_

1. Water Quantity - 75 Potential Points (20-40% of Total) 22%

	Irrigation Efficiency - Use FIRS to evaluate. Benchmark & After points equal actual % efficiency times any multiplier. Total equals after minus benchmark pts.				Benchmark	After
%	% of Area in Contract	% of Area in Contract	After	Points	Points	Points
Efficiency	before Treatment	Treatment				
1% - 75%						
i.e. be	fore 23%, after 42%, = 19	pts. Total for WQ 1. Water	Quantity	Total		

2. Water Quality - 75 Potential Points (20-40% of Total) 22%

A. Surface Water Pollutants - 40 Maximum Points

There is a probability that runoff water from irrigated fields contains sediment, salt, pesticides, and/or nutrients (or other associated chemicals). Treatment is needed to prevent these pollutants from entering live waters, or re-entering a shared irrigation system. Points will be awarded based on distance from the end of the field to the nearest live waters or re-entry point into a shared system. If there is no run-off, after points will be 0.

	Distance of Surface Run-Off to Live Water	Potential	Benchmark	After
	Distance of Surface Run-On to Live Water	Points	Points	Points
<100 Feet		40		
101 - 500 Ft.		30		
501 - 1,320 Ft.		20		
1,321 - 2,640 Ft.		10		
>2,640 Feet		5		
	A. Surface Water	Total		

B. Ground Water Pollutants - 35 Maximum Points

There is a probability that irrigation water containing salt, pesticides, and/or other nutrients (or other associated chemicals) is leaching into the ground water. Treatment is needed to prevent these pollutants from contaminating ground water, through leaching and/or direct flow into wells. Points will be awarded based on depth to the water table or elimination of any direct discharge to ground water (regardless of depth to the water table).

Depth to Water Table		Benchmark	After
		Points	Points
1 - 10 Ft or elimination of any direct discharge into ground water.	35		
10 - 50 Ft.	30		
50 -100 Ft.	20		
>100 Ft.	5		
B. Ground Wat	er		
2. Water Quali	ty Total		

3. Selected Conservation Practice(s) - 150 Potential Points (25-50% of Total) 43%

Any practice used in the ranking criteria and intended to be included in the conservation schedule of operations must be cost-shared or have an incentive payment. Higher priority (value) should be given to those practices which address multiple resource concerns from NM Quality Criteria Guide. Soil Erosion (Irrigation Induced) Irrigation Land Leveling (464) Water Quality (Excessive Pesticide, Nutrients & Sediments) - Irrigation Pipeline (430) Irrigation Pipeline (430) Water Quantity (Insufficient Water use on Irrigated Land) Irrigation Pipeline (430) Irrigation Pipeline (440) Irrigation Pipeline (441) Irrigation Pipeline (442) Irrigation Pipeline (444) Irrigation Pipeline (444) Irrigation Pipeline (440) Irrigation Pipeline (44				
Irrigation Land Leveling (464) 20	schedule of operations must be cost-shared or have an incentive payment. Higher priority (value) should be given to those practices which address multiple resource concerns, are cost effective, and have longer life spans. Select resource concerns from		Need to be
